NIDA HIV SEMINAR SERIES

NATASHA MARTIN, DPHIL/PHD
University of California, San Diego

"Addressing structural drivers of the syndemics of injecting drug use, HIV, HCV, and overdose: insights from modeling population impact"

Dr. Martin is an infectious disease economic modeler with over two decades of experience developing models of disease progression and transmission. Her current research focuses on modeling the population impact and cost-effectiveness of policies and programs to prevent HIV, hepatitis C virus, and overdose among substance-using populations.

WEDNESDAY, OCTOBER 26, 2022
