

International research on HIV at UCSF

Carol S. Camlin, PhD MPH

Professor, Department of Obstetrics, Gynecology & Reproductive Sciences

Introduction to the UCSF/CFAR Research Enterprise, Nov. 19, 2021

Global research on HIV at UCSF

- ▶ UCSF the largest? among largest? research institutions in the U.S. in HIV research funding
- ▶ Multiple centers and institutes as well as large multi-site clinical trial networks
 - ▶ CFAR, ARI, CAPS, Bixby Center, IGHS, etc.
- ▶ Across multiple schools and departments
- ▶ Across multiple disciplines
 - ▶ ***Unparalleled opportunities for cross-disciplinary collaboration in global research on HIV***

UCSF faculty engaged in HIV research in global settings

- ▶ Department of Medicine, Division of HIV, Infectious Diseases & Global Medicine
 - ▶ 34 full-time faculty, 7 postdoctoral scholars, 6 clinical fellows, 100+ international research staff
 - ▶ 87+ Research projects in North America, South America, Europe, Africa and Asia

Christine Dehlendorf, MD, MAS

Sarah Gutin, PhD, MPH

My current portfolio of work

As PI / MPI:

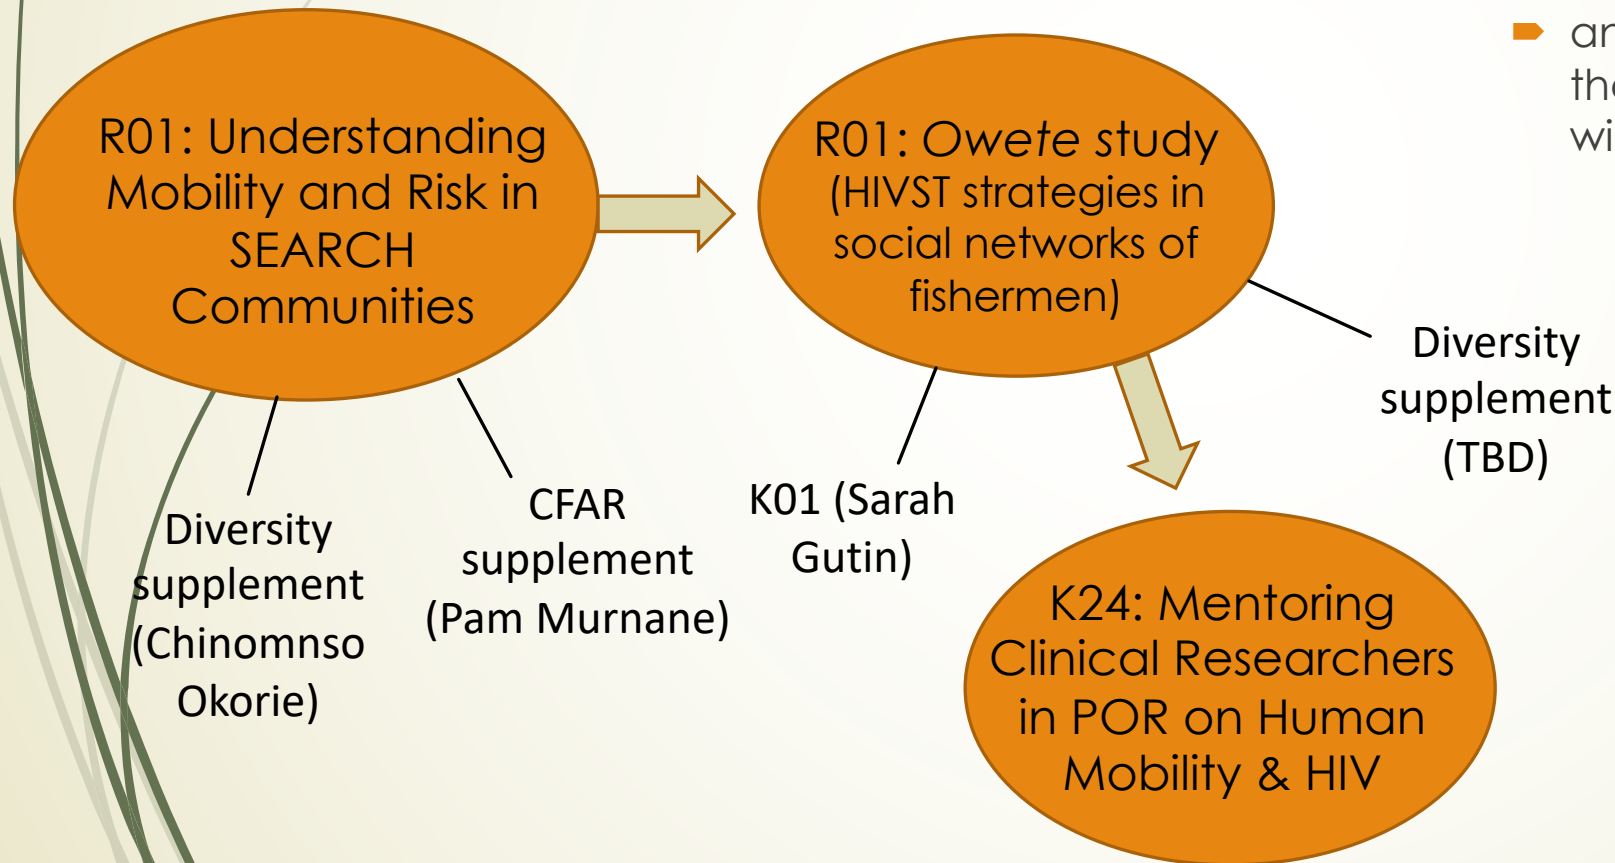

- **Mentoring Clinical Investigators in Patient Oriented Research on Human Mobility and HIV (K24MH126808, Camlin, 2021-2026)**
- **Self-Test Strategies and Linkage Incentives to Improve ART and PrEP Uptake in Men (R01MH120176, Camlin/Thirumurthy, 2019-2023)**
- **Strengthening behavioral and social science research capacity to address challenges in HIV care & prevention in Uganda (Kamya/Camlin/ Katahoire, 2019-2024)**

Lines of research & scholarship

▶ Human mobility, gender, and HIV

- ▶ a focus on migrant and highly mobile women—under-recognized and at high risk

▶ Qualitative and mixed methods within clinical trials to understand pathways of intervention action

- ▶ an interpretivist approach, towards theory generation, in collaboration with data collectors

- SEARCH and affiliated studies (Havlir)
- Alcohol and TB studies (Hahn, Chamie)
- Economic incentives studies (Geng, Thirumurthy)
- Mentee projects (~10)

Research collaboration: Sarah Gutin

- ▶ Using retrospective cohort study data (1R01MH104132, PI Camlin) to conduct longitudinal multilevel analyses exploring impacts of mobility on HIV risk behaviors in rural couples in Kenya/Uganda
 - ▶ Key finding: Sexual risk behaviors within couples are impacted by typologies of mobility, and gender of mobile partner.
- ▶ K01 study NIMH examining approaches for improving male engagement in safer conception/ sexual and reproductive health (SRH) in context of mobility in Kenya – just launched
- ▶ UCSF RAP grant funded study - Development of novel scales to measure HIV-specific social support for safer conception and male involvement in safer conception approaches for the prevention of HIV

Research collaboration: Pam Murnane

- ▶ **Mobility in SEARCH sub-studies**
- ▶ *RAP grant*: Distinct forms of human mobility are differentially associated with HIV treatment adherence
 - ▶ uses Mobility in SEARCH data + hair ARV concentrations as metric of adherence, manuscript under review
- ▶ *CFAR Administrative Supplement*: Geospatial & temporal analyses of HIV-related risk factors in mobile populations
 - ▶ Two secondary data analyses (one spatial, one latent trajectory model) examining mobility among persons living with HIV in association with risk of onward transmission
 - ▶ One qualitative study examining how mobility influences attitudes/preferences re: PrEP in pregnant/postpartum women

Resources for getting involved

- ▶ UCSF Institute for Global Health Sciences **GLOBAL PROGRAMS for Research and Training**
- ▶ Offices in [Kenya](#), [Mozambique](#), [Namibia](#), [Tanzania](#) and [Uganda](#) to support UCSF researchers. Additional office in South Africa pending.
 - ▶ All offices provide administrative support (logistics, contracts, compliance, etc.); many have project management staff.
 - ▶ Expertise in informatics, monitoring and evaluation, surveillance and strategic information.
- ▶ Equitable and Ethical Global Health Partnerships Initiative-- ongoing

Are you a UC researcher interested in working with a Global Programs Office?
